### Preconference 2 (lectures and hands-on)

Attendees: Limited to 25 participants

### Aesthetic Zone Management in Implant Dentistry

This interactive intense workshop will delve into understanding biology, technology, and current interventions in anterior esthetics with dental implants. The high expectations of today's demanding patients bring in more challenges to the clinicians. Though fast developing technology has improved the perio-restorative outcomes, it's appropriate applications through minimally invasive procedures can only be achieved with correct and customized interventions for different situations. This full day course of lecture and hands-on will boost the delegates ability to control the 3D health of tissues around implants and achieve biomimetic and esthetic result.

Course overview:

#### 1. Lectures: 09.00 am to 01.00 pm followed by lunch

- Introduction
- Aesthetic zone risk analysis
- Socket classifications and treatment indications
- Post extraction socket biology and the PDL role
- Various case presentations

#### 2. Hands-on on simulated models

Immediate implants and immediate provisionalization on sockets type 1

- Immediate implants and immediate provisional
- Guided immediate placement
- Guided immediate provisionalization
- Soft tissue management

Costs: INR 13000 for lecture and hands-on (limited for 24 delegates)
